Dear Hiring Manager,

As a young Engineer and a puzzle solver at heart, I love exploring new technologies and finding out how to use them in solving real world problems. After speaking to several industry professionals and JP Morgan Chase employees it has been made clear to me that your company shares the same vision.

I am currently pursuing B.Tech in Artificial Intelligence and Data Science with a keen interest in Data Analytics. I am also a full stack web developer and have created several web applications using React.js for frontend and Python Django for backend APIs. I have a good experience of working on REST APIs, authentication systems with JSON web tokens, Supervised/Unsupervised Machine Learning and Statistical analysis.

Thank you for your time and consideration. I believe my technical knowledge and passion for problem solving would make me a great asset to the software engineering team at JP Morgan Chase & Co.

Sincerely,

Mardav Dorle
